Daniel Carrasco Herrera

Career Summary

Senior Software Engineer with **10+ years of experience building enterprise digital platforms with Adobe Experience Manager (AEM)**. I specialize in designing scalable solutions, leading complex migrations, and integrating AEM with external systems and modern architectures.

Throughout my career, I've worked with global teams delivering platforms for industries such as travel, technology, and luxury brands. I enjoy solving complex technical challenges, improving development practices, and helping teams build reliable and maintainable systems.

I'm particularly passionate about **AEM architecture, headless implementations, and building modular platforms that scale well over time.**

Summary of Qualifications

Proficient In:

- AEM 6.x
- AEM as a Cloud Service
- Sling Models
- OSGi Services
- GraphQL
- Java
- JavaScript
- HTML
- CSS
- GIT
- Adobe Cloud Manager
- CI/CD
- HTL

Languages

- Spanish (native speaker)
- English (advanced)

Career History

Globant, México Dic. 2022 –

Software Designer

- Royal Caribbean - Marketing Team
  - Provided production support and maintenance for the marketing platform.
  - Implemented improvements and fixes to ensure platform stability and performance.

- Clase Azul
  - Led the website redesign and migration to AEM as a Cloud Service (AEMaaCS).
  - Responsible for the production launch of the new site.
  - Implemented a component-based architecture using Content Fragments to improve modularity and maintainability.

- Okta
  - Migrated the documentation and tutorials section into AEM.
  - Improved content structure and maintainability for documentation workflows.

- Seven PARKS
  - Designed the Content Fragment architecture.
  - Implemented GraphQL APIs to expose content models for third-party systems.

- Qiddiya
  - Migrated the Qiddiya Corporate website to AEM On-Premise.
  - Implemented Google BigQuery integration with AEM for analytics and data consumption.

- Supported development of new features for the Booking section for Six Flags and Aquarabia projects.

VMLY&R, CDMX, México May. 2022 – Ago. 2022
Technology Lead

- Led project planning and technical estimations based on client requirements.
- Implemented AWS Cognito SSO integration.
- Managed deployments across development, staging, and production environments.
- Configured and maintained AEM Dispatchers.
- Led integration of eDAM with Adobe Dynamic Media (Scene7).

Softtek, CDMX, México Apr. 2021 – May. 2022
Software Engineer

- Migrated project infrastructure to Adobe Cloud Manager, enabling modern CI/CD practices.
- Implemented integration between AEM and Adobe Campaign Standard for email campaign management.
- Developed AEM templates used to generate email campaigns directly from AEM.
- Managed deployments across development, staging, and production environments.

United Virtualities, Guadalajara, México Apr. 2019 – Apr. 2021
Software Engineer

Worked on several Twitter digital platform projects.

- Developed custom AEM components for modules such as:
  - Careers
  - Marketing
  - Birdhouse
  - Help Center
- Built experimental components using React integrated with AEM.
- Integrated WeChat webchat (Proxima Iris) into the Help module.
- Contributed to development of BHHS.com using AEM 6.4 architecture.
- Implemented backend integrations using Java services and external APIs.
- Developed dynamic configurations using OSGi services.
- Implemented dispatcher redirect modules for multiple subdomains.
- Developed autocomplete functionality for credit card application forms.
- Investigated and resolved production issues and platform bugs.

Additional responsibilities:

- Supported technical proposals for clients.
- Participated in client presentations and technical discussions.

XIDERAL, CDMX, México 2017 – 2019
Sr. AEM Developer

- Developed and maintained AEM components and backend services.
- Managed configurations through the OSGi console.
- Participated in technical analysis and task estimations.
- Reviewed pull requests and supported code quality standards within the development team.

Globant, CDMX, México 2014 – 2018
Sr. AEM Developer

- Developed data ingestion models to load content from external systems into AEM.
- Implemented background processes to replicate ship activities across multiple environments.
- Provided production support and component maintenance across the platform.

Education

Instituto de Estudio de Superiores de Oaxaca, Oaxaca, México 2004 – 2007
Computet Systems Engineering
