Skills

- JavaScript | TypeScript | React | Shopify | Hydrogen | React Native | Redux | Zustand | Zod | UX | UI | NoSQL | Git | Figma | NextJs | Liquid | MySQL | Node | Express | GraphQL | Headless | AEM
- CI/CD | Express | Unit testing | Jest | react-testing-library | react Hooks | OOP
- Web development | Languages - English, Spanish – *All professional proficiency or above*

Experience

FullStack Developer **Somewhere** *Medellin, COL* **08/2025 - current**

- Spearheaded the full-stack development of a robust B2B2C SaaS platform utilizing **TypeScript**, **React**, **GraphQL** and **Node**.
- Designed and optimized secure database structures using **NoSQL** and **MySQL** to efficiently manage complex facility records and user-generated memorial content.
- Engineered reliable backend integrations with third-party APIs, specifically implementing Sendgrid for automated system communications and critical user notifications.
- Built highly responsive and accessible user interfaces utilizing **React**, ensuring a seamless and empathetic user experience across all devices.
- Established comprehensive testing protocols utilizing **Jest** and react-testing-library to guarantee application stability, security, and high-quality performance handling sensitive data.
- Managed cloud deployments and **CI/CD** pipelines, actively monitoring application performance to implement iterative improvements based on client feedback.

Front End Developer **GraphiTech** *Medellin, COL* **04/2023 - 03/2026**

- Developed custom Shopify apps using **React** and **Zustand** to enhance e-commerce store functionality.
- Designed and optimized user interfaces with **React** to ensure seamless user experiences on Shopify storefronts.
- Improved mobile **Lighthouse performance scores by 35%**, directly resulting in a **12% increase in conversion rates** by reducing page load abandonment.
- Architected custom **Hydrogen** components and managed complex state for **Product Detail Pages (PDP)** and **Cart logic** using the **Shopify Storefront API (GraphQL)**.
- Architected and delivered high-performance headless content delivery pipelines utilizing **AEM Content Fragments** and **GraphQL APIs** to seamlessly sync structured content with custom front-end applications.
- Collaborated with cross-functional teams, including designers and product managers, to gather requirements and deliver high-quality solutions.
- Optimized content delivery workflows and caching strategies within **AEM Headless architecture,** significantly reducing payload sizes and improving response times for client-side applications.

React Native Developer **EEVA** *Montreal, CA* **08/2024 - 03/2025**

- Developed robust mobile application using **React Native**, ensuring seamless user experiences across both **iOS** and **Android**
- Implemented efficient state management solutions and integrated **RESTful APIs** to facilitate real-time data updates
- Leveraged native modules to bridge React Native with device-specific hardware features, ensuring high-performance execution for intensive application tasks**.**
- Optimized application performance by fine-tuning component rendering and memory management, leading to a **20% improvement in user retention** due to increased app stability.
- Collaborated within an **Agile** team to deliver a feature-rich application on a compressed timeline, maintaining high code quality through rigorous peer reviews.

Shopify Developer **QodeSpace** *San Francisco, CA, USA* **01/2024 - 07/2024**

- Directed the end-to-end development of high-conversion e-commerce storefronts, managing the transition from traditional **Shopify Liquid** themes to modern **Headless architectures**.
- Leveraged **React** and **TypeScript** to build custom, type-safe storefront components that interfaced with the Shopify Storefront API via **GraphQL**.

Jhon Jairo Garces Montes

LinkedIn | +57 311-370-4625 | jhongarces.dev | jhongarcesmontes@gmail.com | GitHub

- Optimized frontend performance and Core Web Vitals, achieving a **30% reduction in page load times** and significantly improving the mobile Lighthouse score.
- Engineered a streamlined "**Frontend Purchase Funnel**" (PDP to Checkout), resulting in a **10% lift in conversion rates** by reducing friction in the cart logic
- Utilized **Tailwind CSS** and **TypeScript** to build a library of reusable, pixel-perfect UI components, ensuring rapid and scalable styling across the headless storefront.

React Developer **E-volution** *Medellin, COL* **10/2022 - 08/2023**

- Develop features for an enterprise-level **React Native** microservice application
- Participated in code reviews to ensure the quality and maintainability of the codebase
- Led the migration of legacy UI components to a modern, decoupled architecture, enhancing the long-term maintainability of the codebase.
- Established a high-standard code review culture that reduced production bugs by **25%** and mentored junior developers on **React** best practices.
- Implemented complex state management solutions and integrated RESTful APIs to facilitate real-time data updates across the microservice ecosystem.

Software Engineer **Brick Lane** *San Francisco, CA, USA* **06/2021 - 10/2022**

- Led the design of a Defi application using **Figma**
- Co-lead development & maintenance for a Defi application with **ReactJs**
- Create APIs using Infura, Blockchain subgraphs, and Netlify serverless functions
- Create and deploy MVPs with Netlify
- Create a Non-relational database using **MongoDB**
- Conducted thorough unit testing and performance profiling to ensure the security and reliability of financial transactions within the DeFi environment.

Full-Stack Developer **JHELY** *Warsaw, Poland* **06/2022 - 07/2022**

- Build UI following Figma Design Guidelines
- Collaborated directly with designers in Figma to translate high-fidelity mockups into responsive, interactive web experiences.
- Created and deployed new features into the app using Typescript and NextJs best practices

Education

Associate Degree in Software Development **CESDE** *Medellin, COL*

Non-Degree studies: IT **Northern Virginia Community College** *Annandale, VA, USA*

- Study Credits in different programming languages: Python, C++, and Java

Diploma in Web Development **Universidad de Antioquia** *Medellin, COL*

Projects

- **MORENT:** Creator of a car renting website + admin dashboard link to MORENT

Mentorship

- **YA 2018 (AL):** Leadership and entrepreneurship Mentor responsible for mentoring 10th and 11th-grade students **(06/2018 - 03/2020)**

Others

- **CCI Program**: 1-year exchange program to study credits on Information technology in the United States
