Tech Leader · Senior Level 3 (L8) · Sitecore

A Tech Leader who takes over the technical leadership of an in-flight migration from Sitecore on-premises to Sitecore XM Cloud with Next.js, for a global commercial real estate services company with a demanding, platform-savvy in-house technology team.

Must have

- [ ] 7+ years of professional software development experience
- [ ] Leads a project's technical delivery end-to-end, managing the Developers on the team
- [ ] Hands-on technical expertise
- [ ] Project solution design
- [ ] Code review
- [ ] Mentoring
- [ ] Client communication
- [ ] Scope management
- [ ] Team branching and release strategy
- [ ] Scoping and sequencing a project, riskiest work first
- [ ] Executive reporting: value, risks, decisions
- [ ] Stakeholder management
- [ ] Experience with Sitecore Headless (JSS / Headless SXA) and Next.js
- [ ] Experience with Sitecore XM Cloud
- [ ] Has led a development team (people leadership, not only technical direction) on a client project
- [ ] Has joined a project already in flight and taken over technical leadership mid-delivery (onboarding to an existing codebase, decisions and team)
- [ ] Has worked with a demanding client that has its own strong technical team, holding technical positions and managing pushback constructively
- [ ] English B2 or higher

Nice to have

- Familiarity with Sitecore on-premises, the migration's source platform

What the person will do

- Take over the technical leadership of a migration already under way, from Sitecore on-premises to Sitecore XM Cloud with Next.js
- Lead the day-to-day technical execution of the project
- Ensure deliverables meet timelines, quality and defined standards
- Make project-level technical and design decisions
- Guide, review and unblock the Developers through code review and direction
- Coordinate with the PM and the client's technology team on scope, estimates and risks
- Apply architecture standards and escalate gaps and risks
- Mentor the Developers on the team
- Answer for the team's delivery KPIs: propose their targets and review them monthly with the team

Screening

1. "Tell me about the last team you led: how many people, what you were accountable for, and how you handled someone who was struggling." A good answer names a team they managed, not only advised, and a concrete people situation they handled.
2. "Have you taken over technical leadership of a project that was already running? What did you do in your first weeks?" A good answer describes getting to know an existing codebase, decisions and team, and how they set direction without restarting the work.
3. "Describe a disagreement with a client's own technical team. How did you hold or change your position?" A good answer shows a technical argument backed by evidence, respect for the client's expertise, and a resolution.
4. "Which Sitecore XM Cloud projects have you worked on, and how was the head built?" A good answer mentions JSS or Headless SXA with Next.js, and their own hands-on part in it.
5. Check in the CV or profile: 7+ years of software development, at least one role leading a development team, and Sitecore XM Cloud with Next.js named on a specific project.
6. Check English at B2 or higher.

Not a fit if

- Has led only technically (reviews, direction) without managing the people on a team.
- Has no hands-on Sitecore XM Cloud experience, or knows Sitecore only through MVC without the headless (JSS / Headless SXA) and Next.js stack.
- Has fewer than 7 years of software development experience.
- Has only ever started projects from scratch, never taken over one mid-delivery.
- English below B2.
